CYBERTRON®

# Single output SMPS

CYB-SS-01

## Function

The CYB-SS-01 is a fully regulated switch mode power supply providing 12 Volts DC at 1 Amps. The high frequency action enables it to work smoothly on a very wide AC input voltage range from 90 to 280 Volts with comparatively low power losses, high efficiency small size and lesser weight. Application: For 1 camera

## Key Features

- High Efficiency & Low Power Consumption
- Surge Protection & Thermal Protection
- Short Circuit, Over Load & Overvoltage Protection
- Compact Size, Light Weight, Desktop Type White Attractive Cabinet
- Standard Packaging - 100 Pcs
- Application - CCTV Cameras, Strip Lighting, Other Electronic Equipments

**BETTER SECURITY

**CYBERTRON<sup>®</sup>**

## Single output SMPS

### CYB-SS-01

Feature	Specification
Input Voltage	AC 180 - 270 V
Input Frequency	50Hz
Input Current	150mA @ 230V AC
Output Voltage	DC 12V
Output Current	12V DC 1Amp Max
Output Power On	Green LED Indication
Efficiency at full Load @230V AC	>85%
Line Regulation	<1%
Load Regulation	<1%
Dimension	95mm*36mm*25mm
Input Cord	N/A
Weight	50Gms
